Contents of Volume 43

NUMBER 1

W. Johnson	1	Obituary: Professor Pericles S. Theocaris
N. Asnafi	5	On springback of double-curved autobody panels
P. Dadras	39	Plane strain elastic–plastic bending of a strain-hardening curved beam
R. Komanduri and Z. B. Hou	57	Thermal modeling of the metal cutting process — Part II: temperature rise distribution due to frictional heat source at the tool–chip interface
R. Komanduri and Z. B. Hou	89	Thermal modeling of the metal cutting process — Part III: temperature rise distribution due to the combined effects of shear plane heat source and the tool–chip interface frictional heat source
F. Paulsen and T. Welo	109	Cross-sectional deformations of rectangular hollow sections in bending: Part I — experiments
F. Paulsen and T. Welo	131	Cross-sectional deformations of rectangular hollow sections in bending: Part II — analytical models
A. G. Hanssen, M. Langseth and O. S. Hopperstad	153	Optimum design for energy absorption of square aluminium columns with aluminium foam filler
A. A. Elsharkawy	177	On the hydrodynamic liquid lubrication analysis of slider/disk interface
N. M. Auciello	193	On the transverse vibrations of non-uniform beams with axial loads and elastically restrained ends
M. C. Ferris and F. Tin-Loi	209	Limit analysis of frictional block assemblies as a mathematical program with complementarity constraints
A. El-Gohary	225	On the orientation of a gyrostat using internal rotors
K. H. Low	237	A comparative study of the eigenvalue solutions for mass-loaded beams under classical boundary conditions
S. Arndt, S. Swillo and A. G. Atkins	245	Multiple necks around biaxially loaded holes in sheets

T. Liu, S. Kitipornchai and C. M. Wang	265	Bending of linearly tapered annular Mindlin plates
P. Hu, Y. Q. Liu and J. C. Wang	279	Numerical study of the flange earring of deep-drawing sheets with stronger anisotropy
C. W. Bert and M. Malik	297	Letter to the Editor
Calendar	I	

NUMBER 2

W. Nadolski and A. Pielorz	299	Theoretical investigations of nonlinear loads on gear teeth in single gear transmission
M. Yoshino, T. Aoki, N. Chandrasekaran, T. Shirakashi and R. Komanduri	313	Finite element simulation of plane strain plastic–elastic indentation on single-crystal silicon
M. Yoshino, T. Aoki, T. Shirakashi and R. Komanduri	335	Some experiments on the scratching of silicon: In situ scratching inside an SEM and scratching under high external hydrostatic pressures
Q. S. Li	349	Analytical solutions for buckling of multi-step non-uniform columns with arbitrary distribution of flexural stiffness or axial distributed loading
S. Alexandrov, G. Mishuris, W. Miszuris and R. E. Sliwa	367	On the dead-zone formation and limit analysis in axially symmetric extrusion
Z.-C. Lin and S.-P. Lo	381	2-D discontinuous chip cutting model by using strain energy density theory and elastic-plastic finite element method
V. R. Marinov	399	Hybrid analytical–numerical solution for the shear angle in orthogonal metal cutting — Part I: theoretical foundation
V. R. Marinov	415	Hybrid analytical–numerical solution for the shear angle in orthogonal metal cutting — Part II: experimental verification
A. H. Clausen, O. S. Hopperstad and M. Langseth	427	Sensitivity of model parameters in stretch bending of aluminium extrusions
J. Ye	455	Decay rate of edge effects in cross-ply-laminated hollow cylinders
C. L. Chow, L. G. Yu, W. H. Tai and M. Y. Demeri	471	Prediction of forming limit diagrams for AL6111-T4 under non-proportional loading
C. Chen, T. J. Lu and N. A. Fleck	487	Effect of inclusions and holes on the stiffness and strength of honeycombs
X. Dai, X. Zhang and X. Jin	505	The partial and full rubbing of a flywheel rotor–bearing–stop system

J. H. Ku, K. S. Seo, S. W. Park and Y. J. Kim	521	Axial crushing behavior of the intermittent tack-welded cylindrical tubes
G. H. Nie	543	Asymptotic buckling analysis of imperfect shallow spherical shells on non-linear elastic foundation
N. Fang, I. S. Jawahir and P. L. B. Oxley	557	A universal slip-line model with non-unique solutions for machining with curled chip formation and a restricted contact tool
K. H. Low	581	An improved model for the frequency estimate of mass-loaded plates by a combined use of equivalent center mass and stiffness factors
Calendar	I	

NUMBER 3

J. Lin and F. P. E. Dunne	595	Modelling grain growth evolution and necking in superplastic blow-forming
J. Shi, D. L. S. McElwain and T. A. M. Langlands	611	A comparison of methods to estimate the roll torque in thin strip rolling
E. Nakamachi, C. L. Xie and M. Harimoto	631	Drawability assessment of BCC steel sheet by using elastic/crystalline viscoplastic finite element analyses
S. Alexandrov and O. Richmond	653	Couette flows of rigid/plastic solids: analytical examples of the interaction of constitutive and frictional laws
W. Q. Chen and H. J. Ding	667	Free vibration of multi-layered spherically isotropic hollow spheres
P. R. Onck, E. W. Andrews and L. J. Gibson	681	Size effects in ductile cellular solids Part I: modeling
E. W. Andrews, G. Gioux, P. Onck and L. J. Gibson	701	Size effects in ductile cellular solids. Part II: experimental results
I. Sridhar, N. A. Fleck and A. R. Akisanya	715	Cold compaction of an array of cylindrical fibres
H. El-Sobky, A. A. Singace and M. Petsios	743	Mode of collapse and energy absorption characteristics of constrained frusta under axial impact loading
Q. S. Li	759	Free vibration of SDOF systems with arbitrary time-varying coefficients
J. Loughlan	771	The shear buckling behaviour of thin composite plates with particular reference to the effects of bend–twist coupling
J. A. Chamberlain, J. E. Sader, K. A. Landman and L. R. White	793	Incipient plane-strain failure of a rectangular block under gravity
R. L. Bish	817	Rotational continuity in thin transversely deflected iron plates

P. N. Moulik, H. T. Y. Yang and S. Chandrasekar	831	Simulation of thermal stresses due to grinding
Y. J. Kim and N. R. Chitkara	853	Determination of preform shape to improve dimensional accuracy of the forged crown gear form in a closed-die forging process
K. H. Low	871	On the methods to derive frequency equations of beams carrying multiple masses
Calendar	I	

NUMBER 4

A. Tarnogrodzki	883	Theory of free fall breakup of large drops
P.-L. Larsson	895	Investigation of sharp contact at rigid–plastic conditions
J. H. Cho and K. T. Kim	921	Densification of mixed metal powder at high temperature
X. Shu and K. P. Soldatos	935	An accurate de-lamination model for weakly bonded laminates subjected to different sets of edge boundary conditions
W. B. Lee and C. F. Cheung	961	A dynamic surface topography model for the prediction of nano-surface generation in ultra-precision machining
Sung Kyu Ha, D.-J. Kim and T.-H. Sung	993	Optimum design of multi-ring composite flywheel rotor using a modified generalized plane strain assumption
H. L. Xing and A. Makinouchi	1009	Numerical analysis and design for tubular hydroforming
H. S. Kim and S. T. S. Al-Hassani	1027	A morphological elastic model of general hexagonal columnar structures
L. D. Wegner and L. J. Gibson	1061	The mechanical behaviour of interpenetrating phase composites — III: resin-impregnated porous stainless steel
N. R. Chitkara and M. A. Bhutta	1073	Shape heading of splines and solid spur gear forms: an analysis and some experiments
H. Helbawi, L. Zhang and I. Zarudi	1107	Difference in subsurface damage in indented specimens with and without bonding layer
Announcement	1123	
Calendar	I	

NUMBER 5

G. Karpodinis and S. R. Bishop	1125	Sensitivity to noise of interspike intervals produced by an impacting vibrating beam
G. Ma, H. Hao and Y. Miyamoto	1137	Limit angular velocity of rotating disc with unified yield criterion
S.-H. Hsiang and S.-L. Lin	1155	Application of 3D FEM-slab method to shape rolling

L. H. Dai and G. J. Huang	1179	An incremental micromechanical scheme for nonlinear particulate composites
Y. X. Sun and S. Y. Zhang	1195	Chaotic dynamic analysis of viscoelastic plates
K. A. Malo	1209	Water pressure chamber for static testing of panels
N. El-Abbasi, S. A. Meguid and A. Czekanski	1229	Three-dimensional finite element analysis of saddle supported pressure vessels
H. P. Cherukuri and R. E. Johnson	1243	Modelling vertical continuous casting with temperature-dependent material properties
H.-S. Shen	1259	Hygrothermal effects on the postbuckling of shear deformable laminated plates
J. E. Miller, S. Kyriakides and A. H. Bastard	1283	On bend-stretch forming of aluminum extruded tubes — I: experiments
J. E. Miller, S. Kyriakides and E. Corona	1319	On bend-stretch forming of aluminum extruded tubes — II: analysis
B. Raniecki, J. Rejzner and C. Lexcellent	1339	Anatomization of hysteresis loops in pure bending of ideal pseudoelastic SMA beams
Calendar	I	

NUMBER 6

A. Czekanski and S. A. Meguid	1369	Solution of dynamic frictional contact problems using nondifferentiable optimization
J. Lin, D. R. Hayhurst and F. P. E. Dunne	1387	Errors in creep-cyclic plasticity testing: their quantification and correction for obtaining accurate constitutive equations
H. R. Le and M. P. F. Sutcliffe	1405	A robust model for rolling of thin strip and foil
E. Chu and Y. Xu	1421	An elastoplastic analysis of flange wrinkling in deep drawing process
T. Liu, S. Kitipornchai and M. Veidt	1441	Analysis of acousto-ultrasonic characteristics for contact-type transducers coupled to composite laminated plates
R. C. Chang and C. T. Chuang	1457	Stress intensity factors of a crack lying in a viscoelastic layer embedded in two different media under an anti-plane concentrated load
J. A. Greenwood	1473	Elastic contact with a "donut"-shaped asperity
C. Chen, A.-M. Harte and N. A. Fleck	1483	The plastic collapse of sandwich beams with a metallic foam core
N. H. Kim, C. G. Kang and B. M. Kim	1507	Die design optimization for axisymmetric hot extrusion of metal matrix composites

M. N. Hamdan, A. A. Al-Qaisia and B. O. Al-Bedoor 1521 Comparison of analytical techniques for nonlinear vibrations of a parametrically excited cantilever

A. Yavari and S. Sarkani 1543 On applications of generalized functions to the analysis of Euler–Bernoulli beam–columns with jump discontinuities

Calendar I

NUMBER 7

S. Jägering, R. de Boer and S. Breuer 1563 Elastoplastic compaction of metallic powders

R. Lakes 1579 Elastic and viscoelastic behavior of chiral materials

Q. M. Li, R. A. W. Mines and R. S. Birch 1591 Static and dynamic behaviour of composite riveted joints in tension

K. M. Liew, T. M. Teo and J.-B. Han 1611 Three-dimensional static solutions of rectangular plates by variant differential quadrature method

A. Mugadu and D. A. Hills 1629 A shrink-fitted peg subjected to a tensile load

B. W. Huang and J. H. Kuang 1643 Mode localization in a rotating mistuned turbo disk with Coriolis effect

N. R. Chitkara and A. Aleem 1661 Extrusion of axi-symmetric tubes from hollow and solid circular billets: a generalised slab method of analysis and some experiments

N. R. Chitkara and A. Aleem 1685 Axi-symmetric tube extrusion/piercing using die–mandrel combinations: some experiments and a generalised upper bound analysis

Calendar I

NUMBER 8

H. Z. Li, W. B. Zhang and X. P. Li 1711 Modelling of cutting forces in helical end milling using a predictive machining theory

G. W. Wei, Y. B. Zhao and Y. Xiang 1731 The determination of natural frequencies of rectangular plates with mixed boundary conditions by discrete singular convolution

N. Fang and I. S. Jawahir 1747 A new methodology for determining the stress state of the plastic region in machining with restricted contact tools

L. D. Wegner and L. J. Gibson 1771 The fracture toughness behaviour of interpenetrating phase composites

K. C. Jane, M. F. Hwang and C. C. Hong 1793 Effects of unsteady aerodynamic pressure load on the interlaminar stresses of laminated composite strips

J.-T. Gau and G. L. Kinzel 1813 A new model for springback prediction in which the Bauschinger effect is considered

S. Fromentin, M. Martiny, G. Ferron, Z. Tourki, L. P. Moreira and G. Ferran	1833	Finite element simulations of sheet-metal forming processes for planar-anisotropic materials
C.-P. Wu and C.-Y. Lee	1853	Differential quadrature solution for the free vibration analysis of laminated conical shells with variable stiffness
J. Chakrabarty, W. B. Lee and K. C. Chan	1871	An exact solution for the elastic/plastic bending of anisotropic sheet metal under conditions of plane strain
A. Sackfield, C. E. Truman and D. A. Hills	1881	The tilted punch under normal and shear load (with application to fretting tests)
P. Xue, T. X. Yu and E. Chu	1893	An energy approach for predicting springback of metal sheets after double-curvature forming, Part I: axisymmetric stamping
P. Xue, T. X. Yu and E. Chu	1915	An energy approach for predicting springback of metal sheets after double-curvature forming, Part II: Unequal double-curvature forming
H. Matsunaga	1925	Vibration and stability of angle-ply laminated composite plates subjected to in-plane stresses
H. Bart-Smith, J. W. Hutchinson and A. G. Evans	1945	Measurement and analysis of the structural performance of cellular metal sandwich construction
Calendar	I	

NUMBER 9

S. R. Reid	1965	Obituary
Editorial	1967	
H. P. Truong Qui and H. Lippmann	1969	Plastic spin and evolution of an anisotropic yield condition
L. Zhang and I. Zarudi	1985	Towards a deeper understanding of plastic deformation in mono-crystalline silicon
S. H. Lee and D. N. Lee	1997	Analysis of deformation textures of asymmetrically rolled steel sheets
Y. Tomita and T. Iwamoto	2017	Computational prediction of deformation behavior of TRIP steels under cyclic loading
M. Tokuda, T. Inaba, H. Ohigashi and A. Kurakake	2035	Discussions on constitutive equations of superplastic 5083 aluminum alloy
K. C. Chan, C. F. Cheung, M. V. Ramesh, W. B. Lee and S. To	2047	A theoretical and experimental investigation of surface generation in diamond turning of an Al6061/SiC_p metal matrix composite
M. Kawai, Y. Masuko, Y. Kawase and R. Negishi	2069	Micromechanical analysis of the off-axis rate-dependent inelastic behavior of unidirectional AS4/PEEK at high temperature

C. Yan, Y.-W. Mai, Q. Yuan, L. Ye and J. Sun	2091	Effects of substrate materials on fracture toughness measurement in adhesive joints
S. R. Guillow, G. Lu and R. H. Grzebieta	2103	Quasi-static axial compression of thin-walled circular aluminium tubes
P. Xue, T. X. Yu and X. M. Tao	2125	Flat-topped conical shell under axial compression
T. H. Kim and S. R. Reid	2147	Multiaxial softening hinge model for tubular vehicle roll-over protective structures
H. Huh, K.-P. Kim and H. S. Kim	2171	Collapse simulation of tubular structures using a finite element limit analysis approach and shell elements
Calendar	I	

NUMBER 10

B. Dodd and S. R. Reid	2189	Obituary
B. N. Singh, D. Yadav and N. G. R. Iyengar	2193	Natural frequencies of composite plates with random material properties using higher-order shear deformation theory
S.-C. Yu and S.-C. Huang	2215	Vibration of a three-layered viscoelastic sandwich circular plate
R. Komanduri, N. Chandrasekaran and L. M. Raff	2237	Molecular dynamics (MD) simulation of uniaxial tension of some single-crystal cubic metals at nanolevel
A. O. Adewale	2261	Application of the singularity function method to semi-infinite orthotropic rectangular plates on an elastic foundation
G. Schleinzer and F. D. Fischer	2281	Residual stress formation during the roller straightening of railway rails
W. Chen, T. Wierzbicki, O. Breuer and K. Kristiansen	2297	Torsional crushing of foam-filled thin-walled square columns
G. Lu and R. Mao	2319	A study of the plastic buckling of axially compressed cylindrical shells with a thick-shell theory
M. H. Parsa, K. Yamaguchi and N. Takakura	2331	Redrawing analysis of aluminum–stainless-steel laminated sheet using FEM simulations and experiments
G. Yu, R. J. Anderson, T. Maekawa and N. M. Patrikalakis	2349	Efficient simulation of shell forming by line heating
C. Gontier, A. Bouchou and C. Vinot	2371	A mechanical model for the computation of phenolic foams in compression
S.-M. Lin, W.-R. Wang and S.-Y. Lee	2385	The dynamic analysis of nonuniformly pretwisted Timoshenko beams with elastic boundary conditions

H. Naceur, Y. Q. Guo, J. L. Batoz and C. Knopf-Lenoir	2407	Optimization of drawbead restraining forces and drawbead design in sheet metal forming process
K. P. Maity and N. S. Das	2435	A class of slipline field solutions for metal machining with slipping and sticking contact at the chip-tool interface
Calendar	I	
Announcement	III	

NUMBER 11

H. S. Kim and S. T. S. Al-Hassani	2453	Plastic collapse of cellular structures comprised of doubly tapered struts
C. W. Lim and L. H. He	2479	Exact solution of a compositionally graded piezoelectric layer under uniform stretch, bending and twisting
H.-S. Shen	2493	Postbuckling of shear deformable cross-ply laminated cylindrical shells under combined external pressure and axial compression
X. Dai, Z. Shen and H. Wei	2525	On the vibration of rotor-bearing system with squeeze film damper in an energy storage flywheel
L. S. Bayoumi	2541	Cold drawing of regular polygonal tubular sections from round tubes
J. J. Wu, A. R. Whittaker and M. P. Cartmell	2555	Dynamic responses of structures to moving bodies using combined finite element and analytical methods
A. Spagnoli	2581	A new high-cycle fatigue criterion applied to out-of-phase biaxial stress state
G. R. Liu and T. Y. Wu	2597	In-plane vibration analyses of circular arches by the generalized differential quadrature rule
K. M. Liew and Z. C. Feng	2613	Three-dimensional free vibration analysis of perforated super elliptical plates via the *p*-Ritz method
M. Dolce and D. Cardone	2631	Mechanical behaviour of shape memory alloys for seismic applications 1. Martensite and austenite NiTi bars subjected to torsion
M. Dolce and D. Cardone	2657	Mechanical behaviour of shape memory alloys for seismic applications 2. Austenite NiTi wires subjected to tension
A. Nayebi, O. Bartier, G. Mauvoisin and R. El Abdi	2679	New method to determine the mechanical properties of heat treated steels
M. H. Dirikolu, T. H. C. Childs and K. Maekawa	2699	Finite element simulation of chip flow in metal machining
Calendar	I	

NUMBER 12

C. Bréard, J. S. Green, M. Vahdati and M. Imregun	2715	A non-linear integrated aeroelasticity method for the prediction of turbine forced response with friction dampers
S. Naguleswaran	2737	Transverse vibrations of an Euler–Bernoulli uniform beam carrying two particles in-span
A. A. Garcia-Granada, V. D. Lacarac, D. J. Smith and M. J. Pavier	2753	A new procedure based on Sachs' boring for measuring non-axisymmetric residual stresses: experimental application
R. Hambli	2769	Comparison between Lemaitre and Gurson damage models in crack growth simulation during blanking process
G. H. Little and M. D. Heywood	2791	Axial stress waves in an elastic–perfectly-plastic bar
G. R. Buchanan and F. T.-I. Wong	2815	Frequencies and mode shapes for thick truncated hollow cones
N. R. Chitkara and A. Aleem	2833	Extrusion of axi-symmetric bi-metallic tubes from solid circular billets: application of a generalised upper bound analysis and some experiments
N. R. Chitkara and A. Aleem	2857	Extrusion of axi-symmetric bi-metallic tubes: some experiments using hollow billets and the application of a generalised slab method of analysis
P. Tuğcu, K. W. Neale, P. D. Wu and S. R. MacEwen	2883	Effect of planar anisotropy on wrinkle formation tendencies in curved sheets
S.-T. Quek, Q. Wang, L. Zhang and K.-K. Ang	2899	Sensitivity analysis of crack detection in beams by wavelet technique
I. Abu-Alshaikh, D. Turhan and Y. Mengi	2911	Propagation of transient out-of-plane shear waves in viscoelastic layered media
K. T. Kim and J. H. Cho	2929	A densification model for mixed metal powder under cold compaction
P. R. Onck	2947	Application of a continuum constitutive model to metallic foam DEN-specimens in compression
N. R. Chitkara and K. F. Celik	2961	Extrusion of non-symmetric T-shaped sections, an analysis and some experiments
Calendar	I
